The Future Fund Launches New Active ETF, 'FFND'

Aaron Neuwirth

On Tuesday, the Future Fund LLC, an SEC-registered investment advisor, launched its first ETF, the Future Fund Active ETF (FFND). The fund has begun trading and seeks to provide capital appreciation. Gary Black, managing partner, and David Kalis, CFA, partner, have teamed up for a second time to bring the ETF to investors. Each has held portfolio management and investment research positions at some of the most well-known firms in the industry. Together, they have more than 50 years of experience managing portfolios for clients.

“We are focused on change,” said Black. “We have identified a number of secular megatrends that are changing the world and are investing in the companies we believe are best positioned to capitalize on those trends. We’re excited to offer our investors the opportunity to be part of the significant potential we see in the market.”

The Future Fund Active ETF is a high conviction portfolio of approximately 40-50 companies that the firm believes are well-positioned to take advantage of the secular growth trends that will drive both the economy and the markets over the next several years.

“These companies attempt to capitalize on these megatrends we see influencing our daily lives,” said Kalis, “including 24/7 information and entertainment, automation, lifestyle improvements, and climate sustainability. We’re looking for transformational opportunities that could develop over the next several years.”

The portfolio managers target equities that they believe have the potential for significant appreciation, and the fund has no restrictions on sectors. The firm conducts proprietary fundamental research with disciplined risk management to select them, a process developed over three decades.

“We use our deep research experience to look for companies that are potentially worth multiples of their current prices,” added Black.

Black and Kalis previously worked together as portfolio managers, allowing them to come to a consensus quickly in making investments that benefit investors. They both believe in active management, proprietary research, and high-conviction strategies that do not mirror any indices. They decided to enter the market with an active ETF to ensure transparency,

Including disclosing their investment process and positions, and reporting any changes daily, affording investors a clear understanding of the investments in the fund. More information about the advisor and the ETF is available at <https://thefuturefund.com>.

Shareholders may pay more than NAV when buying fund shares and receive less than NAV when selling fund shares, because shares are bought and sold at current market prices. The performance quoted represents past performance and does not guarantee future results.

The Future Fund Active ETF is bought and sold at market price (not NAV) and are not individually redeemed from the fund. Brokerage commissions will reduce returns.

Investors should consider the investment objectives, risks, and charges and expenses of the Funds before investing. The [prospectus](#) contains this and other information about the Funds and should be read carefully before investing. The prospectus may also be obtained by calling 877-466-7090.

The Future Fund Active ETF is distributed by Northern Lights Distributors, LLC, member FINRA/SIPC. The Future Fund LLC is the investment advisor to the Fund, and is not affiliated with Northern Lights Distributors, LLC.

Investing involves risk, including loss of principal. There is no guarantee that the Fund will achieve their investment objectives. In general, prices of equity securities are more volatile than those of fixed income securities. The prices of equity securities fluctuate in response to issuer-specific activities as well as factors unrelated to the fundamental condition of the issuer, including general market, economic and political conditions along with other factors. While the shares of ETFs trade on secondary markets, they may not readily trade in all market conditions and may trade at significant discounts in periods of market stress. The Fund were recently organized with no operating history. In addition, the Advisor has not previously managed an ETF, which may increase the risks of investing in the Fund.

The Fund is actively-managed and is thus subject to management risk. The Adviser will apply its investment techniques and strategies in making investment decisions for the Fund, but there is no guarantee that its techniques will produce the intended results.
